

# MP-X

Modular Process - eXpert

## A Robotic System for Typical Manufacturing Processes

The MP-X offers a basic technology configuration, completed with multiple options and specific tools to perfectly adjust to all manufacturing needs.

### Technologies:

- "Part in hand" robotic system
- Fanuc© 6-axis robot LR Mate
- Programming and operation software: **BrainWave**
- Part loading system

### Options:

- Motors: AC, high RPM, compliance
- Automated abrasives change with tool rack
- Parts loading devices: drawers, rotary table, tray
- Dust collector connected to your factory system
- Force and pressure control
- Tools according to the type of process: dressing and pneumatic tools, laser marker, dot peen marker, etc.
- Connectivity options for remote technical support

### Benefits

- Adaptable to each manufacturer's production
- Easy to use with built-in programming and operating software: **BrainWave**
- A practical solution to hiring difficulties
- Secure closed cell reducing the risk of injury to your operators
- Compact and easily integrated into your production line
- Improvement of the quality and repeatability of your production
- Increased production output
- Significant reduction in abrasive use

## ADJUSTABLE TO DIFFERENT PROCESSES

- Deburring
- Blending
- Grinding
- Others
- Polishing
- Sanding
- Ultra-polishing
- Cutting
