

AV&R Academy presents its first **BrainWave Bootcamp**

Learn with an AV&R specialist about basic BrainWave operations and applied robotics in AV&R systems.

June 5 to 9, 2023
At our facilities in Saint-Bruno (Québec, Canada)

1 week
32 hours of face-to-face training
Theory and supervised application on our systems

Only 8 seats available to a fully personalized live training
First come, first served

Next session:
September 11-15
2023

THE PROGRAM:

1. Machine Overview

2. BrainWave Software

How it works
How it interacts with the robot
Review of the interface
Parameters
User levels
And more

3. Operator Training

Production
Folder management
Tools and tool life

4. Robot Operation

Jogging a robot
Coordinate types
4D view
Start/Stop
AFROS
Run a TPP
MAN_HOME
Robot menus (POS, IO, etc.)
Folder management

5. Manual Operations

Maintenance operations
Manual part pick/drop
Starting a path in learn
Presentation of Robot Scene
Warmup
Calibrations

6. Troubleshooting and Technical Support

Support package
Update BrainWave PC & robot
Reading LOGS
How to make a backup
Components
Mechanical maintenance
Spindle maintenance

Why should you attend?

You are or you will be an **operator** of an AV&R robotic system.

You want to use the full potential of AV&R technology to **boost your operations**.

You want to **be autonomous** in the operation of your AV&R robotic system.
